## Introduction

When your company is using a VLXE Blend network license, the client PC needs information about the license server on your network.

This document shows how that is done.

# **Before you start**

Before you can setup a VLXE Blend network license you need two pieces of information from your IT-administrator:

- 1. Name of the license server on your network.
- 2. Port used by the license server (Default is: 5053).

# How to setup the client PC

Once you have the license server information start Excel and select VLXE Blend/License/Wizard. This will start the wizard.

|    | VLXE Blend   | DEVELOPE      | R                |       |          |       |       |        |       |       |       |       |          |           |   |         |         |   |
|----|--------------|---------------|------------------|-------|----------|-------|-------|--------|-------|-------|-------|-------|----------|-----------|---|---------|---------|---|
| •  |              |               | c                | -%    | <b>}</b> |       |       | •      |       | DIPPR | 2     | Ŧ     |          |           | * | 2       | Û       | Į |
| ng | Calculations | Districutions | Code<br>Generate | Input | Output   | Units | Names | Output | Sheet | DIPPR | DDBST | Quick | Standard | Databases | 7 | Wizard  | Locking | ŀ |
|    |              | Wizards       |                  |       |          | Ut    | ility |        |       | Exte  | rnal  |       | Settings |           |   | License |         |   |

On the first page of the wizard select: "Network license", then select "Next".

| VLXE Blend - License Wizard                                                                                                 |                                                                                                                                                                                                               |        |                 |  |

The software v<br>#2 Network license: You have access t | e chose the one that applies to you.<br>vill only work in this PC<br>o a network license                                                                                                                      | ^<br>~ | Cancel          |  |

On the next page add in the name of the license server and the license server port number.

|                         |                             | Next           |
|-------------------------|-----------------------------|----------------|
| New License Information | Current License Information |                |
| Server Name:            | Server Name:                |                |
| (PS2600                 |                             |                |
| Server Port:            | Server Port:                | Back           |
| i053                    |                             |                |
|                         |                             |                |
|                         |                             |                |
|                         |                             |                |
|                         |                             |                |
|                         |                             | Delesse Lissee |

On the next page select "OK" and restart Excel.

Now select the menu VLXE Blend/License/Check.

This will open a window with a license status.

An example is shown here:

| VLXE Blend - License Wizard                                    |                   |

## FAQ: Clients cannot get a valid license

The license sever is running but your client cannot get a valid license. Most likely this is a network issue. Can the client PC see the license server on the network and was the license server allowed through the firewall on the correct port?

## How do I get support?

If this document did not help you please check our website: http://www.vlxe.com/support. You can also contact VLXE support using the email: support@vlxe.com Bugs or requests can be reported here: http://support.vlxe.com

VLXE is accessible on our website and may be downloaded. If you are interested and would like more information please contact VLXE by means of any of the following addresses.
