# Introduction

VLXE Blend uses license software from Reprise Software. For a standalone license it works by locking the VLXE Blend license to your hard drive. Before a license can be issued, the locking code has to be sent to VLXE.

The steps to be taken are described in the following pages.

# **Generate locking code**

Before a license can be issued for a VLXE product, the locking code of the PC, where the software will be run, is needed. This is done by opening Excel and selecting the menu: VLXE Blend\License\Locking Code:

	VLXE Blend	DEVELOPE	R															
0			c	<b>-</b> %	<b>}</b>			•		DIPPR	2	Ŧ				3	0	
١g	Calculations	Distributions	Code Generate	Input	Output	Units	Names	Output	Sheet	DIPPR	DDBST	Quick	Standard	Databases	Check	Wizard	Locking	ł
		Wizaro				Ut	ility			Exte	rnal		Setting	S		License		

A new window will open. Email the content of this window to VLXE.

# Installing the license

Once the license string is received from VLXE, set up the license by following these steps:

## Step 1

Open Excel and select the menu: VLXE Blend\License\Wizard.

# Step 2

In the first page of the wizard select "Stand Alone License" and then select "Next".
